Education

Kwame Nkrumah University of Science and Technology

Bachelor of Science in Telecommunication Engineering

Kumasi, Ghana

Jan. 2025 – Present

Mfantsipim School

General Science

Cape Coast, Ghana

April. 2022 – September. 2024

Experience

Telecom Engineering Intern – Broadband and Fiber Networks

April 2026 – Present

Telecel Ghana

Tantra Hill, Accra

- Exposure to MPLS network architecture and routing concepts
- Assisted in broadband installation and maintenance of fiber optic networks
- Explored ways to visualize GitHub collaboration in a classroom setting
- Worked as a Broadband Sales Agent, engaging customers and promoting internet services
- Assisted field engineers during network rollout and maintenance operations
- Performed fiber splicing, termination, and testing during field deployments

AI and Machine Learning Intern – Radar and Drone Systems

Sep. 2026 – Nov. 2025

Zaptek Ghana

Dome, Accra

- Developed and tested radar system simulations for target detection and tracking scenarios
- Collaborated with team members to design and refine simulation models
- Contributed to projects involving drone-based sensing and monitoring systems
- Gained practical understanding of radar principles, including wave propagation and object detection

Web Development Trainee – Cohort Bootcamp

March 2025 – July 2025

Zaptek Ghana

KNUST, Kumasi

- Built responsive web pages using HTML, CSS, and JavaScript
- Learned and applied frontend development fundamentals including layout design and UI structure
- Debugged and improved code to enhance functionality and user experience • Developed small-scale web applications as part of cohort-based projects

Projects

Engineering Research | *Python, JavaScript, HTML/CSS, Django, React, Google Maps API* July 2025 – Sept. 2025

- Researched inefficiencies in the university shuttle system, including overcrowding and irregular scheduling frontend
- Assisted in designing and implementing a GPS-based tracking system to monitor shuttle locations in real time
- Collected and analyzed mobility data to identify peak congestion periods

Technical Skills

Languages: Matlab, Python, JavaScript,

Frameworks: React, Node.js, Next.js, React, Tailwind CSS.

Developer Tools: VS Code, Visual Studio, PyCharm, Github, NPM

Libraries: Framer motions, React Icons and Lucide Icons
